Education

George Mason University

August 2024 - Expected May 2026

Masters in Software Engineering (GPA: 4.00 / 4.00)

Fairfax, VA

- **Relevant Coursework:** Database Systems, Computer Systems and Programming, Math Foundations for Computer Science, Software Design and Architecture, Software Testing, Component Based Software Development, Software Engineering for WWW, Object Oriented Software Design.

SR Gudlavalleru Engineering College

August 2018 - April 2022

Bachelor of Science in Computer Science (GPA: 3.67 / 4.00)

AP, India

Technical Skills

Programming & Scripting: JavaScript (ES6), TypeScript, Java, Python, Bash.

Web Development: React.js, Angular (2+), Node.js, Express, REST APIs, HTML5, CSS3, TailwindCSS.

Databases: MYSQL, MongoDB.

Cloud & DevOps: AWS (Lambda, EC2, S3), Docker, Jenkins, Kubernetes, ArgoCD, Ansible.

Tools & Version Control : Git, GitHub, Postman, VSCode.

Certifications : freeCodeCamp JavaScript Algorithms & Data Structures; freeCodeCamp Backend Development & APIs; freeCodeCamp Responsive Web Design.

Experience

Software AG

Jan 2023 – Dec 2023

Software Engineer

Bangalore, India

- Developed a Microsoft Forms-style Questionnaire app in **Angular & TypeScript**, streamlining partner onboarding and **reducing manual processing time by 40%**.
- Built reusable **Angular + D3.js** components (line, area, sunburst charts) for an analytics dashboard, **improving decision-making efficiency by 25%** and enhancing stakeholder insights.
- Engineered UI solutions including a custom seat booking system (adopted by 300+ employees) and resolved critical bugs, **boosting system stability and user satisfaction by 20%**.

Software AG

Aug 2022 – Jan 2023

Software Engineer Intern

Bangalore, India

- Built reusable **design system components** (form elements, modals, etc.) in **Angular/TypeScript**, accelerating feature delivery across multiple apps and improving developer productivity.
- Improved **unit test coverage from 33% → 92%** using **Karma + Jasmine** while collaborating in an **Agile/Scrum environment**, boosting product reliability, reducing regression bugs by 50%, and ensuring on-time sprint deliveries.

Projects

AI-Powered Job Application Assistant | React.js, TypeScript, Node.js, OpenAI API, Docker, AWS, Jenkins, Kubernetes

- Built an **AI-driven Chrome extension + web dashboard** to automate resume parsing, form-filling, and tailored job-application generation, **reducing application time by 60%**.
- Developed the frontend in **React.js + TypeScript** with a clean UI for job tracking, resume customization, and AI-generated responses.
- Implemented backend services in **Node.js + Express**, integrated with **OpenAI API** for NLP-driven resume optimization, and deployed containerized apps via **Docker, AWS, Jenkins, and Kubernetes**.

Online IDE - Cloud-Native Code Platform | React.js, TypeScript, Node.js, Docker, AWS, Jenkins, Kubernetes

- Designed and built a scalable **cloud-native sandbox IDE** supporting multiple programming languages with isolated execution environments, **eliminating local setup overhead**.
- Developed a responsive frontend in **React.js + TypeScript** for real-time code editing, execution logs, and feedback, enhancing developer experience.
- Architected the backend with **Node.js + Express**, containerized workloads using **Docker**, and automated deployments via **Jenkins + Kubernetes**, ensuring scalability for concurrent users.
